

## TANDEM

### CUSTOM STEEL AND TITANIUM

#### Specs

- **Custom built to your specs,** frame and fork.
- **Massive tubes and mono-stay** design for increased lateral rigidity.
- **Basic frame-set** includes titanium frame and Chrome-Moly fork with the following braze-ons: 4 water bottles, down tube bosses, brake cable stops, derailleur cable housing stop and bottom bracket cable guides.
- **All frames include your choice of cable routing.**
- **Satin finish or Bead blast**
- **FULL SUSPENSION** Both Steel and Titanium frames are available in Full-Suspension models. Because this technology is changing so rapidly and because we always want to get you on the best possible frame, prices and the type of rear suspension used are sub-

ject to change. Please call for the latest design and price. We currently use and recommend the Momentum Engineering rear suspension with a Fox Alps 5 shock.

Weights from 3,050 g (6.75 lb.)

Polished finish upgrade - \$400
